✓ Threat Scan	Custom Scan	Hyper Scan
Our most comprehensive scan. It scans all the places malware is known to hide, including Memory, Startup, Registry, and Filesystem Objects. Recommended as your daily scan.	Allows you to scan where and what you want to scan. Modifications include choosing which Objects to scan (Memory, Startup and Registry). Enables you to customize the treatment of Potentially Unwanted Programs (PUPs) and Modifications (PUMs).	Quickly checks Memory and Startup Objects for active malware threats.
